Yes, DOF has been working with Wood during the transition. The HCIM is still operating and DOF has picked up monitoring and O&M of the system.

Janette,

Is DOF maintaining the extraction system so that the water table inside the barrier wall is below the water table outside the barrier wall? Obviously, if Wood is no longer involved, it seems important that DOF knows that they need to be involved in the site as we contemplate moving to the CMS.

Hi Aaron and Lee. I want to give you an update on the pilot study report and the site in general. You might have seen that the property owner has decided to hire a new consultant. Wood is out of the picture and I don't know yet what that means for the pilot study report. I think we may have to accept the report as is and give your comments to the new consultant to use later.

The new consultant is DOF, and the project coordinator is Tasya Gray. She and I have talked once and I hope to talk with her soon about strategy for doing the CMS and beyond. Have either of you worked with her or DOF? Apparently she has experience working at this site several years ago with Geomatrix.

Regards,  
Janette

Hi Janette,

Good morning. I have reviewed the report and my comments are attached. Please let me know if you have any questions.

Thank you,

Aaron King, P.E.

Janette,

As requested, I have reviewed the Rhone Poulenc Carbon Dioxide Neutralization Pilot Study and have comments which are attached in a Word document.

Please let me know if you have any questions.
